Developing AntBot: Visual Navigation based on the insect brain

Robert Mitchell

Master of Informatics
Informatics
School of Informatics
The University of Edinburgh
January 3, 2018

Supervised by
Dr. Barbara Webb

Acknowledgements

I would like to take the opportunity to thank my supervisor, Dr. Barbara Webb, for her guidance, and invaluable insight on the subject matter. My gratitude also extends to Zhaoyu Zhang and Leonard Eberding, two of my predecessors on this project; both have been extremely useful in explaining the existing codebase and operations of the robot where they were not always clear. Finally I should like to thank my parents, for their unwavering support throughout my education; I could not have made it here without them.

Abstract

Declaration

I declare that this disseration was composed by myself, the work contained herein is my own except where explicitly stated otherwise in the text, and that this work has not been submitted for any other degree or professional qualification except as specified.
